# the **DELECTABLES™**

Betty Beet™  
and Clark Cane™  
share just how  
Caramelized  
Sugars are creat-  
ed and why they  
are for flavor  
modifications  
and NOT  
sweetening.

Caramelized  
from simple  
sugars while  
cooked in  
water, under  
direct pressure.

**That's it!**  
**It's that simple**

We start out as simple cane or beet sugars.

We're then cooked in water to just the right levels of caramelization.

Lastly we're delivered as a powder or syrup, ready to improve flavors.

Call us for samples so our caramelized sugar experts can help transform your products today!
